

Company Overview

The Email Laundry is a cloud-based email security service protecting organizations around the world for over 10 years. Utilizing industry-leading threat intelligence, impersonation detection, machine learning, and expert systems, you get unparalleled protection and reliability. The Email Laundry detects and defends against ever-evolving email attacks before they can reach clients' inboxes, and even before the competition.

Cloud Security for MSPs

Email Security: Comprehensive multi-layered protection against CEO (BECs) & W2 fraud, ransomware, and other advanced email threats. The full stack protection includes impersonation detection, threat intelligence, security policies, shared security feeds, as well as connection and content filtering.

Email Continuity: Eliminates email downtime during server outages and features a 14-day rolling messages, remote access, and inbox synchronization.

Email Archiving: Get litigation ready e-discovery and personal discovery in one central repository, making storing, indexing, and searching legacy emails incredibly easy.

Email Encryption: Secure email through PDF encryption, Opportunistic/Enforced TLS, or a secure portal, ensuring your emails are safe from hacking and spying.

Email Branding & Signatures: Create email banners and signatures to streamline your corporate email marketing and branding strategies.

Phishing User Training: Test and teach users when not to click by using safe, real-life phishing emails and videos, helping to reduce phishing susceptibility.
