WHAT'S HIDING IN YOUR ENDPOINTS?
Decode Endpoint Chaos and Take Control

Blind spots, missed patches, and incomplete backups can hide dangerous risks that go undetected. Uncover hidden endpoint chaos and take control of your visibility, tools, and strategies.

45% of organizations say blind spots limit their ability to respond to threats

Unseen Gaps
Unsanctioned apps, alert fatigue, and tool sprawl.

Best-in-Class RMM
Unify visibility, automate device health tracking, and quickly close gaps.

## 60% of cybersecurity breaches are caused by unpatched vulnerabilities
Layered MDR
Automate patching and get 24/7 threat detection with an expert SOC.

Unknown Risks
Unpatched vulnerabilities, lateral movement, and social engineering.

22% of attacks targeted edge devices and VPNs, only 54% were fully fixed

Data Loss
Backup gaps, ransomware attacks, and outdated recovery plans.

Comprehensive BCDR
Implement immutable backups and patch testing processes.
